St Peters, MO 63376

SUMMARY

This proposal outlines a streamlined solution to increase revenue in your credit card division via professional management of users and referrals by Rewards2Connect.com, Inc., led by Dr. Prabhakar Metlapalli, Ph.D., CEO.

GOAL STATEMENT

Banks and Credit Unions are always looking for ways to increase their revenue and expand their customer base.

SOLUTION

Through a novel feature offered at our company web-site (https://rewards2connect.com), your existing or new credit card customers can refer others and generate discount codes. When those referred sign up for credit cards at your institution using such codes, the original user gets cash back if those referrals pay finance charges to offset such cash back. It is a win-win situation: your revenue increases and they get cash back.

Rewards2Connect tracks the referrals and one gets cash even from other referred user's referrals. It goes 2 levels down, so it is a referral cascade.

One can also register as a "referral-only" user to refer others and get cash backs. Full details (including a Demo) at: https://rewards2connect.com.

FINANCIAL SUMMARY

Based on market analysis, banks that implement our technology can expect to see an average 20-50% increase in credit card revenue. There is no investment required; in other words, it is 100% free. Rewards2Connect gets paid only if your customers generate additional revenue through referrals. To get started, register today at https://rewards2connect.com!
